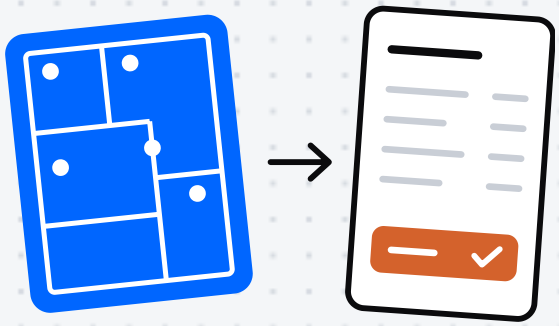
on hand ai
STAFFING

Your estimator is ready to work.

It reads the plans. It counts the parts. It prices a set of plans in about 15 minutes.

From **$1,000 a month**. Free while it trains.



Days of work, done in minutes

By hand

count the parts | wait on prices | type the quote

Days. Some jobs take weeks.

With your estimator

About 15 minutes

That is for a set of plans. A small job with photos takes less.

- ✓ You can bid more jobs.
- ✓ You can answer the customer the same day.
- ✓ You can stop losing jobs to a late quote.

The 15 minutes is for the first draft. It can be ready while you are still on site. You check it. Then you send it.

From one contractor we set up

42,332
parts it can look up

422
past quotes to learn from

12
supply houses it knows

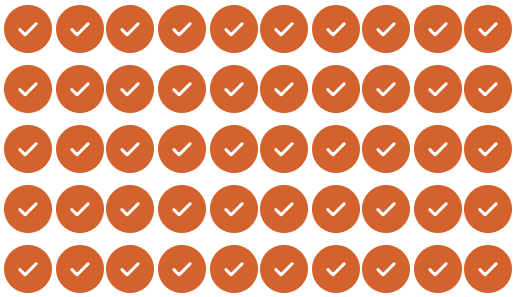
This is one real case. Your numbers will be your own.

Then we tested it on their old quotes

We took 50 quotes that contractor had priced. We gave it the same parts and hours. It got the same price on **all 50**.

Not one was off by more than 2 cents.

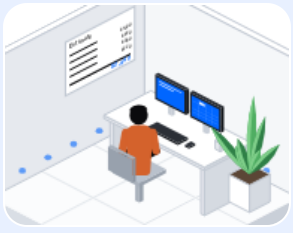
The test shows the math is right. A person still checks each new quote before it goes out.



100%
50 out of 50 matched

It learns how you price

Give it your old quotes and your price list. For a new job, it looks at old jobs like it. Then it shows its math.



Your prices, your past jobs, your layout. Never a guess.

You set the markup

Pick any number. The whole quote adds up again right away.

Parts	at 30%	at 40%
$1,000	$1,300	$1,400

This is an example. The numbers are made up.

How to hire it

1 **Go to app.on-hand.ai/start**

You will see a list of jobs. Pick Estimator.

2 **Say the job**

Tell it what you need. It asks a few short things. Then you save a card. The card is not charged yet.

3 **Connect it**

Sign it in to the place where your jobs and prices live. At first it can only look. It cannot change a thing.

4 **It learns**

Send it one old job. It prices that job, and you check its work. A real person on our team checks too.

5 **It starts**

Happy with it? Press the button that says Start working for real.

It will never do these without asking you

- Send a price to a customer
- Make up a price
- Give a discount
- Change or delete your files

1 estimator	2 estimators	3 estimators	4 or more estimators
$1,000 a month	**$2,000** a month	**$3,000** a month	**Let's talk**
Most companies start here	A steady flow of bids	A full estimating team	A price for your volume

Training is free. You pay only once it does the job.

Then $1,000 a month for each estimator's worth of quoting.
No setup fee and no usage charges. 15% off on a 1-year plan.
Prices in US dollars, before sales tax.
